Tu rutina diaria

Tarea: Tell me about your daily routine. What do you usually do in the morning?

Respuesta modelo:

Honestly, my mornings tend to set the tone for the entire day, so I'm fairly disciplined about them. I'm an early riser by nature, so I'll usually be up by half six, and I make a point of exercising or reading before the day takes over. Rather than diving straight into emails, I prefer to ease in with a proper coffee and a moment to gather my thoughts. It's a small ritual, but I find it makes me far more productive.

Tu tiempo libre

Tarea: What do you like doing in your free time?

Respuesta modelo:

My free time has become genuinely precious to me, so I try to use it deliberately rather than just letting it slip away. I've always been drawn to the outdoors, so hiking and cycling are my go-to ways of unwinding. That said, I equally treasure quieter pursuits, losing myself in a novel or experimenting in the kitchen. Ultimately, though, what restores me most is good conversation over a long meal with people I'm close to.

Tu ciudad

Tarea: Tell me about the town or city where you live.

Respuesta modelo:

I live in a mid-sized city in northern Spain, and it strikes a balance I've come to appreciate enormously. It's vibrant enough to offer a thriving cultural scene and excellent food, yet compact and friendly enough that it never feels overwhelming. What I value most is how walkable it is. If I'm honest, the climate leaves something to be desired, but that's a trifling complaint set against such a high quality of life.

Gente en un parque

Tarea: Describe this photo. What can you see? What are the people doing?

Respuesta modelo:

What immediately strikes me about this image is its carefree, summery feel. In the foreground, a group of young friends are sprawled on the grass, deep in animated conversation, while one of them is capturing the moment on her phone. The bright light and lush greenery suggest a glorious afternoon in late spring or summer. Further back, you can just make out other people ambling through the park. The whole scene radiates a sense of ease and friendship, and I'd hazard a guess that they're savouring a well-earned day off together.

Una comida en familia

Tarea: Describe this photo. Where are the people and what are they doing?

Respuesta modelo:

This photograph beautifully captures the warmth of a family gathering. Several generations are seated around a generous table at home, evidently relishing a meal together. Going by the spread of food, I'd say it marks some kind of celebration, perhaps a birthday or an anniversary. People are chatting and laughing, one woman is busy serving a dish, and a child appears delighted by something. It encapsulates one of those fleeting yet precious moments that bind families together, and it's exactly the kind of scene I treasure in my own life.

Ejercicio al aire libre vs gimnasio

Tarea: Compare these two photos. One shows people exercising outside and the other shows a gym. Which do you prefer?

Respuesta modelo:

Both images depict people keeping fit, yet the settings could hardly be more different. The first shows runners out in the open air of a park, whereas the second captures someone training in a sleek, fully equipped gym. Exercising outdoors has an undeniable appeal: it's free, invigorating, and far less monotonous. The gym, by contrast, offers consistency and a wealth of equipment regardless of the weather. On balance, I'd come down firmly on the side of the outdoors, chiefly because I find that being immersed in nature does as much for my mind as it does for my body.

Ciudad vs campo

Tarea: Compare these two photos. One shows a big city and the other shows the countryside. Where would you prefer to live?

Respuesta modelo:

These two photographs encapsulate one of the most enduring dilemmas there is: urban versus rural living. The first bursts with the energy of a major city, all towering buildings and ceaseless traffic, while the second exudes the tranquillity of rolling countryside. City life undeniably offers career prospects and an endless array of amenities, though often at the cost of stress and expense. The countryside, conversely, promises peace and space, albeit with a degree of isolation. Were I forced to choose, I'd increasingly gravitate towards the countryside, as I've come to prize serenity over the relentless buzz of the city.

Redes sociales

Tarea: Some people think social media is bad for young people. Others think it is useful. What is your opinion?

Respuesta modelo:

This is a debate with compelling arguments on either side, and I can readily appreciate both. On the one hand, social media has revolutionised the way we connect, dismantling geographical barriers and handing ordinary people a platform they could scarcely have dreamed of. It has proved invaluable for education, activism and even small enterprises. On the other hand, the drawbacks are impossible to dismiss. Excessive use has been convincingly linked to anxiety and disrupted sleep, particularly among the young, and misinformation spreads with alarming ease. There's also the insidious tendency to measure our lives against carefully curated highlight reels. Weighing it all up, I'd argue that social media is neither inherently good nor bad; what truly matters is the degree of awareness and restraint we bring to it.

Aprender inglés

Tarea: Why do you think it is important to learn English today?

Respuesta modelo:

To my mind, mastering English has never been more valuable than in today's deeply interconnected world. First and foremost, it serves as the lingua franca of our age, unlocking communication across borders and cultures in a way no other language quite manages. Professionally, it can be transformative; command of English frequently distinguishes one candidate from another and opens doors that would otherwise remain shut. Beyond the practical, it grants access to an extraordinary wealth of literature, film and scholarship. Some contend that advances in translation technology will soon render all this redundant, but I remain unconvinced; an algorithm can render words, yet it cannot replicate the nuance and rapport of genuine human exchange. All things considered, I'm firmly persuaded that few investments yield such enduring returns as learning English.
